01 Profile

Writing software since 2019. Designing it with the people who use it.

I wrote my first programs in 2019, in a maths, physics and computer science class at École des Sciences Byimana. In 2023 I started software engineering at African Leadership University in Kigali, and I have worked on real products ever since: interfaces for an agritech startup, a bike sharing app, a live EV charging platform, a career platform I co-founded. Today I lead creative direction at 4PM Digital Agency. The method has not changed: meet the people who will use the product, test with them early, ship, then watch what happens in production.

50+
Charging stations kept online

8,000
Charging sessions a month on a platform I ran

1,200
Beta users on Aplini, which I co-founded

78.5
Usability score in the Byaboneka+ field test

02 Experience

Jun 2026 to now
Kigali

Creative Director · 4PM Digital Agency Ltd
Digital agency in Kigali building websites, apps and brands for businesses.

- Lead creative direction on client projects, from the first scope to launch, working with the agency's designers, developers and specialists.

Dec 2024 to Jun 2026
Kigali

IT Officer · EVPlugin E-Mobility Rwanda
Charging platform for drivers, station operators and site owners.

- Kept the platform healthy for more than 50 stations and about 8,000 sessions a month: availability, failed sessions, payment errors, incidents to a root cause.
- Matched charging transactions against Mobile Money payments and chased every gap until the books closed.
- Tested releases before live chargers, fixed defects, wrote user guides and trained station staff.

Jan 2025 to Jan 2026
Kigali, part time

Co-founder and Software Developer · Aplini
Career platform for finding and applying to jobs. About 1,200 beta users.

- Built it with Next.js, Node.js and Supabase, including semantic matching on OpenAI embeddings and pgvector.
- Set up SQL dashboards and used them with user feedback to choose what to build next.

Dec 2024 to Dec 2025
Kigali

Product Designer and Developer · S.U.L E-Mobility
Customer web app and campaigns for an e-mobility brand.

- Shipped the customer web app on a reusable component system and shot the campaigns that brought the first qualified leads.

03 Earlier roles

2024 to 2025	**Mobile App Developer** · GURARIDE Rwanda Design and mobile development for a consumer mobility app.
Sep to Dec 2024	**Frontend Developer** · Agrisense Technologies Web interfaces for machine learning crop and soil advice.
Sep to Oct 2024	**UI/UX Designer, intern** · ThinkGreen Afrika Research, wireframes and Figma prototypes.
Sep 2022 to May 2023	**Multimedia and IT, independent** · Freelance Ten projects and more for businesses and NGOs: websites, identities, photo, video.

04 Selected work

EV CHARGING · OPERATIONS SOFTWARE

NEXUSCHARGE

Software that runs an EV charging business from the charger to the bank: drivers, payments, tax receipts and the books.

EV CHARGING · LIVE OPERATIONS

EVPlugin

Kept a charging platform healthy for more than 50 stations and about 8,000 sessions a month.

TRANSPORT · TRUST AND SAFETY

Byaboneka+

Lost and found for Kigali's buses and motos, with ownership checks before anything changes hands.

FINTECH · SAVINGS GROUPS

Kibina

Replaces the notebook and the group chat for savings groups. Every balance comes from a double entry ledger.

05 How I work

User centred
3 languages on every product

Tested
SUS 78.5 in the field

Ready to pivot
Roadmap set by activation data

Monitored
50+ stations, 8,000 sessions a month

06 Skills

Build
TypeScript, JavaScript, Python, SQL, React, Next.js, Node.js, Express, Django, REST

Data and infrastructure
PostgreSQL, Supabase, MongoDB, Redis, pgvector, Docker, GitHub Actions, AWS

Design
Figma, Framer, User interviews, Usability tests, Wireframes, Design systems

Operate
Sentry, Grafana, Alerts, Incident triage, Root cause analysis, SQL reporting

Payments
Mobile Money, Card payments, Reconciliation, RRA EBM invoicing

Media
Photoshop, Illustrator, Premiere Pro, After Effects, DaVinci Resolve

07 Education

2023 to 2026	**BSc (Hons) Software Engineering** · African Leadership University, Kigali Second Class Honours, Upper Division. CGPA 4.32 out of 5. Capstone: Byaboneka+, supervised by Dirac Murairi.
2019 to 2022	**A Level: Maths, Physics, Computer Science** · École des Sciences Byimana Final grade 55 out of 60.

Certifications: Google UX Design (Google) · APIs (Meta) · GitHub Actions (Duke University) · Grafana Fundamentals (Grafana Labs, 2025) · Kubernetes Pod Management (Coursera, 2025) · ITIL 4 Foundation (In progress, Dec 2026)

Languages: English (fluent) · French (fluent) · Kinyarwanda (fluent) · Sign language (fluent)
